

## **SECTION C**

### **MITIGATION MONITORING PROGRAM**

As discussed in the SEIR, this project addresses a minor change to the adopted Mitigation Monitoring Program for the Lake Hodges Pump Station (PS 9) component of the ESP. Table A-1 summarizes the revisions to ESP Mitigation Measure R-8 as a result of the proposed action. ESP Mitigation Measure R-8, as presented on page 6-67 of the Final MMP for ESP (Ogden, August 1996), has been revised to read:

“R-8: The Authority will coordinate with the San Dieguito River Park JPA to ensure that final design of PS 9 allows for realignment of the proposed Coast to Crest Trail affected by the pump station site.”

No other sections of the previously adopted ESP MMP are affected by the proposed action.

**C. MITIGATION MONITORING PROGRAM**

**Table A-1. Revisions to ESP Mitigation Measure R-8**

<b>Environmental Effect</b>	<b>Level of Significance</b>	<b>Proposed Mitigation</b>	<b>Level of Significance After Mitigation</b>
<p>Recreation:</p> <p><u>Permanent Impact:</u> The PS 9 footprint will eliminate a portion of the existing Coast to Crest Trail. The impacts to recreation would be significant.</p>	Significant	The Authority will coordinate with San Dieguito River Park JPA to ensure that final design of PS 9 allows for realignment of the proposed Coast to Crest Trail affected by the pump station site.	Less than Significant
<p><u>Temporary Impact:</u> Construction of the Lake Hodges Pump Station (Pump Station 9) will result in temporary closure of the Coast to Crest Trail during construction activities. Construction activities would last approximately 2 years, and thus impacts to recreation would be significant.</p>	Significant	<p><del>... and that access to the existing segment of the trail is replaced during construction.</del></p> <p>No feasible mitigation identified.</p>	<p><del>Less than Significant</del></p> <p>Significant and Unmitigable</p>
