*Central Control System

Note:

► **Professional installation** is highly recommended. Average cost to install is \$250-\$350+.

► For **manufacturer-certified installers**, contact the manufacturer directly

► For **licensed landscape contractors**, contact the local California Landscape Contractors Assoc. at (858) 658-0471 or www.clcasandiego.org

► **San Diego County Water Authority** does not endorse or recommend any contractor listed on the CLCA website or any contractor certified or referred by a product manufacturer. These resources are provided as a convenience to customers of the San Diego County Water Authority (SDCWA) Smart Landscape Program. SDCWA, its consultants and their subconsultants do not assume any liability for services performed and are not responsible for any agreements made between customers and landscape contractors. SDCWA does not warrant the performance of any product listed above. Actual water savings may vary.

- ▶ This list is **subject to change** by the San Diego County Water Authority pending results from the Irrigation Association's Smart Water Application Technology product testing. Eligible products must meet the following criteria: Monitor and use information about environmental conditions for a specific location and landscape - information such as soil moisture, rain, wind, the plants' evaporation and transpiration (I/TO) rates, and, in some cases, plant type and more - to decide for themselves when to water, and when not to, providing exactly the right amount of water to maintain lush, healthy growing conditions.
- ▶ The **Manufacturer's Suggested Retail Price** varies due to the type of technology, whether management and maintenance services are included, and the number of stations.
- ▶ To learn more about Smart Landscape Irrigation Controllers, please visit the **Irrigation Association's** website:
