Grade Level:

4th

2010 ESSAY FORMAT

Use the lined rectangle here to **WRITE** your answer to the question...

What Does Being Water Smart Mean To Me?

Remember, you must have **more** than 50 words and **less** than 250. Good luck!

First Name:

Melissa

Last Name:

Deorsola

School Name:

Sunset View
Elementary

Teacher's Name:

Mrs. Marsolais

Grade Level:

4th

Being water smart means you know how to preserve water. Water is important because if we didn't have water, we could all die. San Diego gets water from the Colorado river and from Sacramento-San Joaquin river. South California has a shortage in water because of the warming weather that causes drought, and more people are moving into California and the need for water is increasing and we are not conserving water properly.

One way to conserve water is to take showers instead of baths. Use a cup of water to wash your hands instead of letting the water run. You can use it for brushing your teeth too. Another way is to use a barrel to get the rain from the rain-gutter. You can install a sprinkler for your yard.

The benefits of conserving is when the city is going through a drought period. Then there will be more water to share, and animals and plants will survive too! Being water smart is great for everyone!
