Grade Level:

*3rd*

2010 ESSAY  
FORMAT

Use the lined rectangle here to **WRITE** your answer to the question...

What Does  
Being  
Water  
Smart  
Mean To  
Me?

Remember, you must have **more** than 50 words and **less** than 250. Good luck!

First Name:

Ben

Last Name:

Salatka

School Name:

Barnard

Teacher's Name:

Mrs. Pope

Grade Level:

3rd

Being watersmart means to be smart about how much water we use. At home, my family is watersmart by fixing leaking faucets, not using dishwashers and washing machines so often, taking shorter showers, and using less water in the bathtub. Water conservation means to be protective of water and not waste it. New ways to be watersmart are: avoiding keeping the faucet running while brushing your teeth and also taking showers instead baths. You use more water taking baths and if you take a shower you can turn off water while washing your hair and body. Another way is to wash your hair and brush your teeth while taking a shower. New ways San Diegans can save water are: Switching to drought-tolerant plants instead of plants that use lots of water. Planting Succulents helps you save water. They are drought-tolerant, and make your garden prettier than it was before because they come in so many shapes, sizes, and colors. Planting fake grass instead of real grass also helps you save water. With these simple ideas, San Diegans can save lots of water.
