RE: Rate Relief for Water Suppliers in Southern California

Dear Ms. Gray and MWD Board –

Given the financial challenges created by the recession and the COVID-19 pandemic across MWD's service area, I'm asking you to reduce the costs of water supply and transportation services for 2021. This fall, you have an opportunity to help water agencies and ratepayers across Southern California weather this unprecedented storm.

Many water agencies across the region are facing significant financial pressure due unpaid bills by residents and their own efforts to provide rate relief. They have taken steps such as freezing hiring, delaying or deferring projects, and reducing travel and training.

One approach that would benefit all MWD member agencies would be to reduce MWD's transportation rates (System Access and System Power) by \$15 per acre-foot. This would require a 1.3% reduction in MWD's almost \$2 billion budget, or about \$24 million. It would reduce the planned untreated water rate increase and benefit all MWD member agencies.

I support other ways that MWD can trim costs without materially impacting services while offering rate relief to all Southern California ratepayers. As we usually pass through wholesale rate increases, any reduction by MWD would translate to a rate reduction for our customers.

Thank you for your consideration of this and other steps that can be taken to support residents and businesses during these challenging times.

Sincerely,

Brett Sanders  
General Manager
