

Neighborhood Advisory – Animal Monitoring

December 2017

What: The Water Authority's contractor will be conducting small animal monitoring in your neighborhood. This work includes monitoring future work areas for a rare species, pocket mice. If pocket mice are found, precautions will be taken during construction to protect the mice. You may notice biologists in the area around sunrise and dusk.

When: Monitoring will be at sunrise and dusk from Sunday, Dec. 10 to Friday, Dec. 15.

Why: The Water Authority is in the design phase of the First Aqueduct Structures Rehabilitation project, which includes rehabilitating 68 concrete vault structures, piping improvements, and replacing 14,000 linear feet of liner within the pipelines. The work begins just north of SR-76, east of Couser Canyon Road and ends south of Lake Hodges at Highland Valley Road. Construction is anticipated to begin in late 2018.

If you have any questions or concerns email CIPinfo@sdcwa.org or call the project info line at (877) 682-9283, Ext. 7009.

The San Diego County Water Authority sustains a \$220 billion regional economy and the quality of life for 3.3 million residents through a multi-decade water supply diversification plan, major infrastructure investments and forward-thinking policies that promote fiscal and environmental responsibility. A public agency created in 1944, the Water Authority delivers wholesale water supplies to 24 retail water providers, including cities, special districts and a military base.

This work will not affect delivery of water to your home.
