 - Santa Fe Irrigation District
 - South Bay Irrigation District
 - Vallecitos Water District
 - Valley Center Municipal Water District
 - Vista Irrigation District
 - Yuima Municipal Water District
- OTHER REPRESENTATIVE**
- County of San Diego

You are receiving this letter because your property at **XXXXXX** is within the Water Authority’s right of way and will experience some impacts during the upcoming Northern First Aqueduct Structures and Lining Rehabilitation Project.

Beginning in September 2018, the Water Authority will rehabilitate approximately 2.8 miles of Pipelines 1 and 2 in 9 separate segments along a 14-mile stretch of pipeline traversing the communities of Valley Center, Escondido and San Diego. The project will extend the service life of the pipeline up to 75 years. Construction of the project is anticipated to occur in phases and be complete in Summer 2020. Construction impacts will vary by property. Below is more information about the project and what to expect.

Your Property & What to Expect

Construction crews will conduct most of the work underground, inside the pipe. They will access the pipe by excavating and entering the pipeline through access sites called portals. A typical portal involves excavating a 25-foot-by-40-foot area to remove one section of pipe. Establishing portals is faster and has less impacts to the environment and community than replacing the entire pipe.

Portal X will be on your property, see attached maps for specific location.

Most construction activities will occur at these access portals and will be underground within the Water Authority’s right-of-way or in public streets, where the existing pipeline to be rehabilitated is located. To avoid night work and minimize the amount of time the pipeline is out of service, construction will occur from 7 a.m. to 7 p.m. Monday through Saturday.

Project Schedule

July 2018	Advertise Contract
September 2018	Award Contract
October 2018	Construction Begins
Summer 2020	Construction Ends

Project Benefits

A public agency providing a safe and reliable water supply to the San Diego region

1. Extends pipeline's service life
2. Ensures water system reliability
3. Less impactful to community and environment
4. Costs significantly less than other repair methods

Contact Us – We'd Like to Connect with You

We are available to answer any questions you have about the project, and if you prefer, we can schedule a time for you to meet with the project engineer at your property. For questions or to set up a meeting, please contact us at:

Phone: (877) 682-9283, ext. 7009

Email: cipinfo@sdewa.org

Thank you for your cooperation,

Brent Fountain, Project Engineer
Senior Engineer
San Diego County Water Authority

Ashley Jenkins, Outreach Representative
Public Affairs Representative II
