Fences of concrete, stone, or similar materials are considered walls and not permitted under this subdivision.

(2) Fence posts may be secured in concrete or similar material that is poured into the post hole. Fences of concrete, stone or similar materials are considered walls and not permitted under this subdivision.

(3) When a fence is located in a manner that obstructs direct access to an Authority pipeline or other structure, or between an Authority pipeline or other structure and the Authority's regular patrol road, the Director shall require that a fence be constructed and maintained in a manner that permits visibility through the fence at a height of thirty-six inches (36"), and may require installation of a gate.

(5) Any fence that crosses the Authority's right of way shall include a gate within the right of way as specified by the Director of Engineering. Gateposts shall be installed in accordance with the provisions of this chapter governing fence posts. Gate attachment/locking device shall provide space for an Authority lock that works independently of any lock installed by the permittee. Chains may be used as a locking mechanism for gates. If a gate is located adjacent to a public or private roadway that crosses the right of way, then the gate shall be set back, whenever feasible, as follows: (i) if the gate opens towards the roadway, the setback shall be a minimum of forty feet (40’) from the closest edge of the roadway, (ii) if the gate opens away from the roadway, the setback shall be a minimum of thirty (30’) feet from the closest edge of the roadway. The setback from rights of way used for access or patrol road purposes shall be 10 feet from the centerline of the road. The Director of Engineering may reduce or eliminate the setback requirement for a use if the Director finds that the reduction will not be detrimental to the Authority. The reasons for and conditions of the reduction or elimination shall be stated in the permit issued for the use.
