

*Building Water Reliability*

## Lake Hodges Projects Community Updates

March 23, 2009

The San Diego County Water Authority is working to ensure that the San Diego region has a safe, reliable water supply. The Lake Hodges Projects, part of the Emergency Storage Project, will help keep water flowing throughout the region if catastrophic events such as an earthquake or prolonged drought were to cut off imported water deliveries. New information about project communications follows.

The Water Authority would like to congratulate Mr. Richard Lohnes and Ms. Jamie Robb, who were winners of the “Going Green” drawing. Both names were randomly drawn. Each winner will receive a \$50 gift card of his or her choosing.

The drawing was part of the Lake Hodges Projects “Going Green” campaign to conduct all future communications electronically. The environmentally-friendly approach will help reduce paper waste, protect the environment, and help ensure you receive future communications more promptly than through the standard U.S. Mail.

If you have any questions about the project or need additional information, please email [ESPinfo@sdcwa.org](mailto:ESPinfo@sdcwa.org), call (877) 426-2010, or visit our website.

Thank you for your support and understanding as we construct these critical water facilities to support the region’s \$171 billion economy and the quality of life of 3 million residents.

Sincerely,

Scott Robinson, Public Affairs Representative, Lake Hodges Projects  
San Diego County Water Authority

*The Emergency Storage Project is a system of reservoirs, interconnected pipelines, and pumping stations designed to make water available to the San Diego region in the event of an interruption in imported water deliveries.*

*The Emergency Storage Project is part of the Water Authority’s Capital Improvement Program to enhance and increase the operational flexibility of its water delivery system.*
