EMERGENCY STORAGE PROJECT
Lake Hodges Projects Update
Meeting Summary

DATE: May 17, 2010
TIME: 7 p.m.

ORGANIZATION: Del Dios Town Council

MEETING LOCATION: Del Dios Fire Station, Escondido, California

ATTENDANCE: 16

PRESENTERS: Scott Robinson, Public Affairs Representative, SDCWA
Jeremy Shepard, Project Manager, SDCWA

PRESENTATION SUMMARY:

Jeremy Shepard informed the Del Dios Town Council that major construction activities are winding
down on site. Most of the work is now concentrated on wiring and assembling the pump station’s
equipment and transitioning into testing and commissioning of the facility. He indicated that the
Lake Hodges Projects are anticipated to begin commercial operations by the end of the year.

Jeremy said the security patrolling the project site was removed. The segment of the Coast to
Crest Trail that crosses the project site, which was closed to safely allow for construction, was now
open for weekend use only. He added that weekend trail use restrictions would be lifted later in the
year. He also anticipated opening Lake Drive before construction of the Lake Hodges Projects is
complete at the end of the year.

Scott Robinson and Jeremy concluded the update and said that the Water Authority would
continue to provide the Del Dios Town Council with updates on a quarterly or as-needed basis.
